

Sustainability: improving our products, people and planet

Top Management – Overseeing and progressing Telespazio's leadership and commitment to a ethical approach to sustainability

Sustainability Team – volunteers representing the voice of our Company to develop the ideas that will enable us to pursue a path towards sustainability

Supply Chain – working with suppliers who share our principles of integrity and transparency

Innovation – allow our people the opportunity to explore sustainable technology of new products and services that will future-proof our industry

People – Our people are our business, prioritising our commitment to supporting the development of all employees, providing a positive working environment and promoting recognition

Planet - we are committed to reducing our environmental impact by looking at how our products and services can enable efficiencies while increasing value

Prosperity – As we look to future growth of our products and services, we must explore ethical ways of doing so

ESG – Environmental Social Governance
Identifying ways Telespazio UK can commitment to do more, such as actively strive to contribute positively to the environment or social causes and to conduct business responsibly.
